Subjects

Analysis, qualitative, Spectroscopy in, 25

Apparatus and equipment, New, 20, 89, 173, 233, 270

Applied studies at Corby Grammar School, 71

Aspects of teaching energy at school level, 192

Atomic orbitals, 28, 92

Atomic sizes in chemistry teaching, 156

Audio-visual aids in science education: what does the future hold? 101

Audio-visual equipment, 131

Bath University of Technology, Chemistry at, 243

Beer, How to make your own, 73

Subjects—*continued*

Biochemistry and food science (Progress report), 53

Book reviews (letters), 47, 48

Books, 37, 84, 141, 177, 223, 262

Caesium chloride, The structure of, 183

Centre for science education, 231

Chemical education—a commonwealth view, 247

Chemical electronics for schools, Inexpensive—Part, 1, 5

Chemical industry (Progress report), 203

Chemical laboratory, Safety in the, 56

Chemical literature, Is British chemical education keeping pace with the, 68

Chemicals from micro-organisms, 62

Chemical structures, On vizualizing, 99

Chemistry and economics, 272

Chemistry and philately, 207

Chemistry at Bath University of Technology, 243

Chemistry at the University, of Surrey, 148

Chemistry of the Grignard reagent, 199

Chemistry in New Zealand, 92

Chemistry, inorganic, in the sixth form, 238

Chemistry on tv, 32

Chemistry teachers, In-service training of, 257

Chromatography at school level, 9

Closed-circuit television in the teaching of chemistry, 111

Colorimetry, Near infrared, 61

Conferences, Courses and, 34, 81, 137, 174, 231, 261

Continuous assessment of practical work in the Scottish HNC course in chemistry, 154

Cosmetics: a science fair project, 171

Courses and conferences, 34, 81, 137, 174, 231, 261

Courses for teachers, 272

Crystal structure models, 186

Curricula under examination, 93

Detergents, Modern, 75

Dimensions, 46

Economics, Chemistry and, 272

Editorials, Guest, 49, 93, 143, 185, 237

Education, technological, in France, The reform of, 50

Electrochemistry, Organic—Part 2, 15

Electronics, Inexpensive chemical, for schools—Part 1, 5

Energy at school level, Aspects of teaching, 192

Engineering science at the University, 47

Equipment, New apparatus and, 20, 89, 173, 233, 270

Essay reviews, 129, 214

Esso's Fawley experiment—Getting students into industry, 144

ETV for schools, 106

Films, 33, 83, 139, 176, 230, 260

Films, Teaching chemistry by, 121

Food science, Biochemistry and (Progress report), 53

France, The reform of technological education in, 50

Getting students into industry—Esso's Fawley experiment, 144

Grignard reagent, Chemistry of, 199

Guest editorials, 49, 93, 143, 185, 237

History of pvc, Notes on the, 13

HNC course in chemistry, Scottish, Continuous assessment of practical work in, 154

How to make your own beer, 73

Inexpensive chemical electronics for schools—Part 1, 5

Industry, Intellectual challenge in, 2, 91

Infrared colorimetry, Near, 61

Inorganic chemistry (Progress report), 163

Inorganic chemistry in the sixth form, 238

In-service training of chemistry teachers, 257

Intellectual challenge in industry, 2, 91

Is British chemical education keeping pace with the chemical literature? 68

Kinetics, 183

Kinetics experiment, 92

Laboratory, Safety in the chemical, 56

Literature, chemical, Is British chemical education keeping pace with the, 68

Long shadow of the university, The, 49

Magnetic boards, 47

Micro-organisms, Chemicals from, 62

Models, Crystal structure, 186

Modern detergents, 75

Museums and science education, 143

My idea of a career in petroleum chemicals, 210

Near infrared colorimetry, 61

Nomenclature, 46

New apparatus and equipment, 20, 89, 173, 233, 270

New Zealand, Chemistry in, 92

Nucleophilic attack, 91

'One of the most beneficial results attending the study of chemistry', 220

On vizualizing chemical structures, 99

Orbitals, Atomic, 28, 92

Organic chemistry (Progress report), 94

Organic electrochemistry—Part 2, 15

Organic photochemistry—Part 2, 253

Ozone in organic chemistry, Uses of, 166

Petroleum booklet, 229

Petroleum chemicals, My idea of a career in, 210

Phenylpropiolic acid and its esters, 22

Philately, Chemistry and, 207

Phlogistian outlook, 92

Photochemistry, Organic—Part 2, 253

Physical sciences in a college of education, 161

Programmed chemistry? 109

Programmed learning in chemistry, 100

Progress reports, 53, 94, 163, 203

Publishing for the school science revolution, 217

Pvc, Notes on the history of, 13

Qualitative analysis, Spectroscopy in, 25

Queries in chemistry, 36, 90, 182, 273

Readers' forum, 46, 91, 142, 183, 236, 269
